

施工总承包项目经营与履约管理平台

把现场干了多少、分包完成多少、花了多少钱和还能赚多少连起来。

适用对象 施工总承包企业、专业承包商及承担海外施工任务的工程公司。

现场完成量能够进入分包、付款和成本管理

客户常见的难题

施工现场每天都会产生工程量、材料、机械、劳务、检查、变更和付款信息。如果现场记录与合同、成本和资金分开管理，项目经营结果只能事后统计。

带来的改变

项目经理可以从合同和成本追到现场事实。工程量、付款和成本之间少做重复对账，分包履约和项目利润也更容易及时掌握。

平台怎么解决

01 分包合同从头管到尾

从工作包、工程量和采购结果，接到合同、付款、变更和完工量申报。

02 人材机用量有记录

管理材料采购与进场、机械台班、劳务用工和零星采购。

03 现场问题一直跟到关闭

施工日志、报审、质量安全检查、作业许可和整改都能在线处理。

04 成本和付款能够对上

业务发生时归集成本，比较预算、合同、付款、实际成本和利润空间。

一条代表性业务闭环

拆分工作包与工程量

形成分包合同

记录现场完成量

办理计量与付款

归集资源和实际成本

查看分包履约与利润

选一个分包工作包，看看现场数据如何进入合同、付款和成本管理。

General Contractor Project Delivery & Commercial Management Platform

Connect work completed on site with subcontract performance, payments, cost and margin.

BEST FOR General contractors, specialist contractors and engineering companies delivering international construction projects.

A common project challenge

Every day the site creates records for quantities, materials, equipment, labor, inspections, changes and payments. When those records sit apart from contracts and cost, the project only learns its commercial position after the fact.

What changes

Project managers can trace contracts and cost back to site activity. Teams spend less time reconciling quantities, payments and cost, while subcontract performance and margin stay visible.

How INNOWERKS helps

01 Manage subcontracts from start to finish

Connect work packages and quantities with tender results, contracts, payments, changes and completed work claims.

02 Record labor, materials and equipment

Manage material purchasing and arrival, equipment shifts, labor and spot purchases.

03 Follow site issues through closure

Handle daily logs, submittals, quality and HSE checks, permits and corrective actions online.

04 Match cost with payment

Capture cost as work happens and compare budgets, contracts, payments, actual cost and margin.

A representative workflow

Choose one subcontract package and see how field data reaches contract, payment and cost control.
